About Me

I have been coding for three years and a front-end developer for a year. I am eager to learn new skills and keep myself up to date. I write reusable and readable code and focus most of my time on improving my coding skills. I also have personal and teamwork experience.

Skills

- HTML - HTML5 Canvas
- CSS - Sass - Bootstrap - Tailwind CSS
- JavaScript - TypeScript - React JS - Next JS - React Native
- Material UI - Mantine - Redux
- Git - C# - Unity - Linux

Projects

metaversus - Open source
TypeScript | Next.js | Tailwind CSS

This project was made from Figma design. It is **responsive**, **pixel-perfect**, and also used a **new experimental feature** of **Next 13** (app directory).

Project Management - Open source
TypeScript | Redux | Redux Persist | Next.js | Material UI | Tailwind CSS

Pixel-perfect project with **Material UI**, **TailwindCSS**, and **Redux Persist**, to store and manage data. Like all other projects, this one is **typescript** to avoid bugs.

Car Library - Open source
TypeScript | Next.js | Material UI | Redux | Tailwind CSS

In this project, I focused on the data structure. It has a **fully dynamic data structure** that everything can change **(CRUD)**.

Deliveroo Clone (React Native) - Open source
TypeScript | React Native | Nativewind | Redux

This is one of my training projects to increase my coding ability for making **cross-platform apps**. Also, I have experience using **Electron js** to make windows and Linux apps with React and Next js.

React Dashboard , Todo App and ...

These and more projects are in: https://github.com/ghanbari-dev/

Experience

MyDong.ir
Internship

My first experience in teamwork was with the MyDong team. Doing tasks, being in constant contact with designers, learning how to solve problems, innovation, etc ... was excellent achievement.

yektadg.com
Front-end developer

Larestan City Council Website
TypeScript | Next.js | Material UI Bootstrap 5 | SSR/ISR | React Context

In this project, I work with **designer and backend team**. Checking backend data type for **typescript**, making everything **pixel-perfect** and **responsive**, and using **git** was challenging and great experience.

Education

Mechanical Engineering
Master's degree: Shahid Bahonar University of Kerman
Bachelor's degree: University Of Hormozgan

Language

Persian: Native
English: Intermediate

Soft Skills

- Problem solving
- Creativity and ideas
- Perseverance
- Responsibility
